Introducing materials healthy for skin and earth.

non chemical UV milk

Exhibitor: [CHANSON COSETICS INC.](#)

Zone: Contract Manufacturing / Private Label Zone

Preparing ingredients derived from the nature which selected carefully abundantly.

from
Japan

Material developed base on collaborative research with doctors.

GO-VC (new nonionic and amphilic ascorbic-acid derivative)

Exhibitor: [I.T.O. CO., LTD.](#)

Zone: Ingredients Zone

GO-VC has various effects such as moisturizing, anti acne, whitening, high stability, anti bacteria, and more.

from
Japan

Natural surfactant originally developed.

KANEKA Surfactant

Exhibitor: [KANEKA CORPORATION](#)

Zone: Ingredients Zone

Natural surfactant made by fermentation. Also check out its technology seminar!

from
Japan

Various ways of usage! For cosmetics, supplements, more and more.

Sudachin(R)

Exhibitor: [IKEDA YAKUSOU CO., LTD.](#)

Zone: Ingredients Zone

Sudachi, a citrus fruit from Tokushima Prefecture. Its peel extract powder.

from
Japan

Total support for your fragrance business.

Fragrance compound oil for perfume & eau de toilet

Exhibitor: [NEONE CREATION CO., LTD.](#)

Zone: Container/Packaging Zone

Fragrance compound created by French perfumer and fragrance compound oil composed by only natural raw material.

from
Japan

Deodorizing power of sugar cane extract

Molasses Extract MSX-245

Exhibitor: [MITSUI SUGAR CO., LTD.](#)

Zone: Ingredients Zone

Can be used for cosmetic hair care products, pet's toilets or deodorizing sprays

from
Japan

Japanese native plant for high moisturising effects on skin!

YAMA NO KIBUDOU Crystal Sap eco

Exhibitor: [SAKO-HONTEN CO., LTD.](#)

Zone: Ingredients Zone

Crimson glory, a native plant in Japan organically grown in orchard now finding its new usage for cosmetics with high moisturising effect.

from
Japan

Academic Forum: Discover the cutting-edge ingredients technologies!

At Academic Forum, researchers of universities and national/public institutes will present their latest research results through Oral Presentation and Poster Session.

Please note: Some seminar may not have interpretation.

You can request appointments to presenters via the [Exhibitor & Product Search](#).

Cosmetics development by native plants mat'l, using technics of low temperature, vacuum, dry method

Presenter: Mr. Takashi Sano, Company Corporated Engineer, **THE UNIVERSITY OF TOKYO**

Poster Display: Jan. 23 (Mon) 10:00 ~ 18:00

[>> Details](#)

Outlines/Features of Research	This system is working under low temperature. The vacuum system makes it easy to make extractin from the plants. The extrcted steam will be cooled in the closed piping system and gathered as the liquid. Any alcohol is not used in this system.
Differences with Conventional/Competitive Technologies	Nomal vacuum dry system, steam will not gathered but throwed out. Less water and decrease mass and weight is the main purpose of that system. Low temperature will not make any chemical and physical change.

New organic brilliant film material

Presenter: Dr. Keishin Handa, Cordinator, **RIKEN**

Poster Display: Jan. 24 (Tue) 10:00 ~ 18:00

[>> Details](#)

Outlines/Features of Research	Lately, new organic transparent film material with extraordinary high refractive index approximately about 2.6 at 550nm and low oxidizability has invented at Riken. This new material is expected to be used for cosmetic application, for example, sunblock liquid, face powder, radiant cosmetics etc., which are gentle with skin. We need partners who develop these applications and products with us.
Differences with Conventional/Competitive Technologies	This new organic transparent film shaped material has extraordinary high refractive index approximately about 2.6 at 550nm, low oxidizability, flexibility, and characteristic appearance.

Tissue-Engineered Product for Skin Regenerative Medicine: EGF-incorporating Skin Care Product

Presenter: Dr. Yoshimitsu Kuroyanagi, Emeritus Professor, **KITASATO University**

Poster Display: Jan. 25 (Wed) 10:00 ~ 18:00

[>> Details](#)

Outlines/Features of Research	Laser therapy and chemical peeling are a superficial burn caused by heat and chemicals. A skin care product should promote epithelialization and upper layer dermis healing. The product is prepared by freeze-drying of aqueous solution of hyaluronic acid, collagen, EGF, vitamin C derivative, and glucosyl ceramide etc. EGF efficacy can be maintained for a long period because of freeze-dried product.
Differences with Conventional/Competitive Technologies	Laser therapy and chemical peeling are conducted in aesthetic clinic. After these treatments, epithelialization and upper layer dermis healing are necessary. EGF- skin care product will open a new business market. Chemical peeling is conducted in aesthetic salon. Chemical peeling is a superficial burn injury. If this concept would be general, a market will be opened for aesthetic salon.
